- Does not deteriorate or decompose

R-value	3.7 @ 1 inch
Density	.045 lb/ft ³

*Aged R-value at 4 inches per ASTM C518

READY. SET. FOAM.

Don't wait on your foam to mix; get to spraying quicker. **Sealection[®] NM** is formulated to increase productivity on the jobsite. Sealection NM does not need to be pre-blended before spraying.

No more waiting for your open-cell foam to mix prior to spraying. Sealection NM is ready to spray when you are. We know jobsite time is crucial and losing time on mixing is money lost. Changeovers and faster setup add to a more efficient job with less hassle or room for error.

Complies with the International Building Code[®] (IBC), the International Residential Code[®] (IRC), and the International Energy Conservation Code[®] (IECC).
