

ICYNENE[®] / NO- OC / MIX

OPEN CELL SPRAY FOAM

Exceptional
Performance in
Reducing Heat Transfer

HUNTSMAN
BUILDING SOLUTIONS

Icynene[®] OC No-Mix is the most effective insulation system to seal, protect and insulate structures. Icynene OC No-Mix spray foam insulation is a fully adhered seamless barrier against the harshest of environments. Additional benefits of Icynene OC No-Mix include noise attenuation and significant reduction in unmanaged moisture. Additionally, the product's ability to tightly seal the envelope reduces temperature fluctuations and the presence of hot and cold pockets inside, greatly enhancing indoor comfort and providing energy savings.

It is essential for any operation to eliminate air infiltration, control moisture, and maintain consistent temperatures while reducing energy costs. Icynene OC No-Mix Spray Foam Insulation effectively seals the building envelope, filling in any cracks and crevices.

PRODUCT FEATURES

- Firm adherence to framing members and substrates
- Non-emissive technology
- No mixing requirements
- New construction and retrofit applications
- Greenguard Gold Certified

R-Value	R-3.9 @ 1" R-13 @ 3.5"
Density	0.5 lb/ft ³
Air Permeance	< 0.02 L/sm ² @ 3.5"
