FOAM-LOK™ LPA 2800-4G

SPRAY FOAM ROOFING

FOAM-LOK™ LPA 2800-4G

SPRAY FOAM ROOFING

FOAM-LOK 2800-4G spray polyurethane foam is specifically designed to deliver a high performance, fully adhered roofing system providing insulation and waterproofing over a variety of roof deck substrates and configurations. FOAM-LOK creates a monolithic membrane, eliminating the need for mechanical fasteners and is ideal for low-slope roofing applications in new and retrofit construction.

Spray Foam Roofing effectively stops heat transfer through the roof deck, minimizes conditioned air from escaping, and restricts unconditioned air from entering the building, all while reducing energy costs.

BENEFITS

- Eliminating Seams and Joints
- Added Protection
- Building Proper Drainage
- Weather Durability
- Repair vs. Replace
- Life-Cycle Cost Reduction
- Energy Conservation

FEATURES

- Renewable
- Self-flashing
- Fully adhered
- Waterproof membrane
- No nails or fasteners
- Seamless insulation blanket
- Protects against wind-uplift
- Conforms to unique architecture
- Improved sprayability
- Global Warming Potential (GWP) >1
- Ozone Depletion Potential (ODP) = 0
